

# ROOF STYLES

## REGULAR STYLE, HORIZONTAL ROOF

HORIZONTAL ROOF

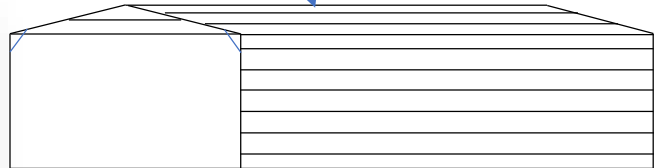

MOST ECONOMICAL. LOOKS MORE UTILITARIAN. RIBS OF ROOF PANELS ARE HORIZONTAL OR PARALLEL TO THE GROUND. WATER WILL RUN OF THE FRONT AND/OR BACK. SOLID ITEMS (SNOW, LEAFS, ETC.) WILL NOT SHED OFF.

## A-FRAME STYLE, HORIZONTAL ROOF

HORIZONTAL ROOF

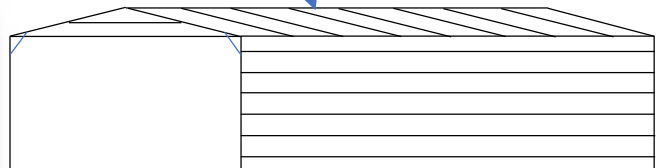

SLIGHTLY MORE COSTLY THAN REGULAR STYLE. CREATES A "BOXED EAVE" WHICH MAKES IT LOOK MORE RESIDENTIAL. RIBS OF ROOF PANELS ARE HORIZONTAL OR PARALLEL TO THE GROUND. WATER WILL RUN OF THE FRONT AND/OR BACK. SOLID ITEMS (SNOW, LEAFS, ETC.) WILL NOT SHED OFF.

## A-FRAME STYLE, VERTICAL ROOF

VERTICAL ROOF

MOST COSTLY. CREATES A "BOXED EAVE" WHICH MAKES IT LOOK MORE RESIDENTIAL. RIBS OF ROOF PANELS ARE VERTICAL, GOING FROM THE PEAK TO THE EAVE SIDES, THEREFORE ALLOWING ITEMS SUCH AS RAIN, SNOW AND LEAFS TO SHED OFF THE ROOF.
